

3D MOUSE FOR ENGINEERS
ANIMATORS AND ARCHITECTS

NAVIGATE YOUR 3D WORLD

It's like you're reaching in to the screen
and holding the model in your hand.

Discover what's possible with a 3D Mouse ...

Redefine the way you work with 3D applications. Pan, zoom and rotate as if you're holding the model in your hand or fly like a helicopter through three-dimensional worlds. It's a level of control that's simply not possible with a traditional mouse and keyboard. Whether you're creating dazzling 3D models or exploring virtual worlds, with a 3D mouse you can set your imagination free!

Unlock the power of your 3D application with the advanced control, comfort and performance features of the 3Dconnexion Professional Series.

SpacePilot™ PRO
The Ultimate Professional 3D Mouse

SpacePilot PRO is the ultimate professional 3D mouse, engineered to excel in today's most demanding 3D software environments.

- **Second generation QuickView Navigation Keys** – one touch access to up to 32 standard views for improved error detection, design review and design presentation.
- **Dual-function Intelligent Function Keys** – easy access to 10 application commands for an optimized workflow.
- **LCD Workflow Assistant** – visual feedback on function key assignment, model properties*³, Microsoft Outlook, and more.
- **Keyboard Modifiers** – convenient Ctrl, Shift, Alt and Esc keys for accessing special application functionality or editing capabilities.
- **Advanced wrist rest design** – full width for maximum comfort and increased focus even during the longest work sessions.

*³ The SpacePilot PRO Model Properties applet is currently available for: SolidWorks, Autodesk Inventor, Siemens NX, Siemens Solid Edge, PTC Pro/ENGINEER.

SpaceExplorer™
Professional 3D Mouse

SpaceExplorer is the 3D mouse of choice for design professionals who demand performance, comfort and style.

- **QuickView Navigation Keys** – one touch access to four standard views for improved error detection, design review and design presentation.
- **Intelligent Function Keys** – easy access to two application commands for an optimized workflow.
- **Keyboard Modifiers** – convenient Ctrl, Shift, Alt and Esc keys for accessing special application functionality or editing capabilities.
- **Advanced wrist rest design** – for a comfortable working experience.

Standard-Series

SpaceNavigator™ for Notebooks
Portable 3D Mouse

With SpaceNavigator™ or SpaceNavigator™ for Notebooks, everyone can enjoy the freedom of professional 3D navigation, at home, at work or on the road.

SpaceNavigator for Notebooks is two thirds the size and half the weight of its desktop counterpart. Its convenient protective travel case makes it ideal for mobile 3D users.

SpaceNavigator™
3D Mouse

3D Mouse Benefits

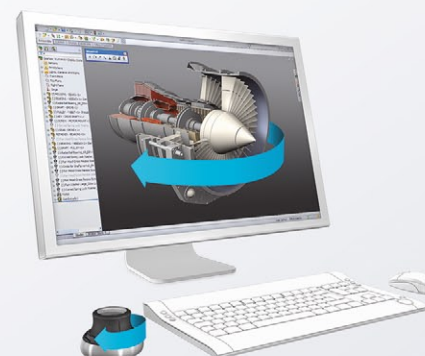

- 1. Increase Productivity by more than 20%*¹:**
Save time by navigating your model with the 3D mouse in one hand, while simultaneously using your traditional mouse to select, create and edit.
- 2. Enhanced Comfort:**
By spreading the workload across both hands, you reduce traditional mouse clicks by up to 50%*².
- 3. Design Performance*¹:**
Whether you're working on a sketch or a complex 3D model, the superior navigation experience encourages levels of model exploration that are crucial to avoiding costly design errors.

Using a 3D application with a traditional mouse and keyboard only means clicking your mouse to pan, zoom and rotate models and then stopping to select, create and edit. It's a very "stop start" process that disrupts creativity, derails your train of thought and wastes time.

Find a better way with a 3Dconnexion 3D Mouse.

Two Handed Power

3D mouse users benefit from a balanced and cooperative work style. One hand engages the 3D mouse to position the model or navigate the environment while your other hand simultaneously uses the traditional mouse to select, create or edit. It's a two handed work style where you click a lot less and accomplish a lot more.

A Virtual Extension of You

At the heart of every 3Dconnexion 3D mouse is the Controller Cap. Gently push, pull, twist or tilt to simultaneously pan, zoom and rotate models or camera views. Increase pressure to go faster or decrease pressure to make intricate adjustments.
